

GROOVEBOX RECORDS

We're Groovebox Records, a vinyl store based in Melbourne and we're looking for web design and development for our new online store.

We've been selling new and used records to the people of Melbourne for over 6 years now, however we want to allow people from all over the world to be able to buy from us online.

We're very open to ideas for the layout design and style of our website but we'd like the homepage to include:

- Our company logo
- A hero image
- A search and basket button
- Our top 12 record picks of the week
- An interesting hover effect over the vinyl covers including the artist, album name and price
- A footer including our social media links

We'd also like a menu to enable users to be able to filter the records by genre.

We're open to suggestions for colors and fonts – the only requirement is that we want it to look groovy!
